

This letter is designed to voice an opinion to protect spectrum as labeled as the General Mobile Radio Service. As a licensee, I have made a large investment into this service, not only getting my family licensed, but building repeater systems and getting others to follow. We want to make sure that the GMRS spectrum remains licensed, barring the introduction of FRS/GMRS hybrid radios which have caused interference not in the interest of the GMRS licensee. If spectrum change policy is being considered in the GMRS, I would humbly request that NO changes be made, that the service is protected and licensing is continued. Furthermore, enforcement efforts should continue to remove the contraband from the service. Thank you for letting me post my comment.
